

## WELDED STRUCTURE CONTROL BENCHES

Control workbenches are workstations that have the peculiarity of being able to be customised due to their versatility, according to the customer's needs. It consists of the workbench base, electrical strip, perforated panel and spoiler with lamp.

To configure the necessary item, choose the workbench model that best suits our needs and add the control bench concept.

Example: Workbench Mod. B-2.

NOTE: This type of benches allows to customize the welded structure of the workbench as well as the electrical strip according to the customer's needs.
