

COMPUTER DISPLAY MODULE

Additional cabinet for housing computer screens. Its design and dimensions make it easy to place on any work surface. The basic equipment is the same as the computer cabinets. These cabinets are available in 3 different designs, depending on the screen model:

- CRT display module
- Touch display module
- Flat display module

CRT DISPLAY MODULE

CRT display modules are the first models of this type of cabinets that were designed for cased computer displays. Due to their wide inside space, they are also used for charging portable batteries. These modules are provided with a recessed methacrylate door at the top and a removable keyboard tray with a closing cover at the bottom.

DIMENSIONS		
L (mm)	D (mm)	H (mm)
726	720	730

COD.	REF.
1261100	AO-700

EQUIPMENT

Removable keyboard tray

1 Grilled fan

Cable-crossing device

Power strip with 6 outlets

TOUCH DISPLAY MODULE

The touch screen modules are designed for screens that do not use a keyboard and are customised according to the customer's screen, who will provide the dimensions of the screen and its fastening points to adapt the cabinet to its characteristics. There is also the option of fitting a door for peripherals.

DIMENSIONS		
L (mm)	D (mm)	H (mm)
726	300	590

COD.	REF.
