

SUITABLES FOR THE STORAGE OF FLAMMABLES LIQUID CONTAINERS

ACCORDING TO NORM UNE - EN 14470

Certified by laboratory accredited by the ENAC

Sarralle Muebles Metálicos is a company that has designed, developed and manufactured at its facilities in Azpeitia fire resistant cabinets, from where they are shipped all over the world.

Fire resistant cabinets are equipped with fire protection systems to isolate the products stored inside. The level of protection is called with the initials EI (in spanish Integrity and Insulation), according to European regulations, followed by a digit indicating the number of minutes of protection.

In our case, the two approved models are registered as EI-90.

These types of cabinets have a double objective:

- 1- To isolate the inside of the cabinet by closing the doors and the ventilation ducts hermetically, protecting the products stored inside the cabinet.
- 2- The level of protection EI indicates the time margin that firefighters have before a possible ignition inside the cabinet.

AIG-1000 MODEL

AIG-1000 Model

COD.	REF.
1211510	AIG-1000

External Dimensions:	726 x 720 x 1105 mm.
Internal Dimensions:	592 x 547 x 868 mm.
Equipment:	1-Hinged door / 2- Height adjustable fixed Trays.
Weight:	227 Kg.
Larger container capacity:	18 Liters
Bucket collection of retention:	580 x 515 x 70 mm. / 20,9 Liters
Maximum volume:	205 Litres. As long as the largest container is not more than 18 liters

AIG-2000 MODEL

AIG-2000 Model AIG-2000

COD.	REF.
1221510	AIG-2000

External Dimensions:	1026 x 720 x 2105 mm.
Internal Dimensions:	892 x 547 x 1868 mm.
Equipment:	2-Hinged doors / 4- Height adjustable fixed Trays.
Weight:	540 Kg.
Largest container capacity:	28 Liters
Bucket collection of retention:	880 x 515 x 70 mm. / 31,7 Liters
Maximum volume:	310 Liters. As long as the largest container is not more than 30liters.

* Delivery time of these articles AIG will be confirmed with each order..

* The standard colour of the AIG models is yellow RAL1032.
